EDUCATION

BACHELOR OF TECHNOLOGY (B.TECH) – COMPUTER SCIENCE ENGINEERING

Indira Gandhi Delhi Technical University for Women (IGDTUW), Delhi
Expected Graduation: 2029

TECHNICAL SKILLS

- Programming Languages: Python, C, C++
- Tools & Concepts: Git/Github , file handling (CSV), modular programming

PROJECTS

MoodMap (Python)

- Built a Python application to manage user state over time using mood logs, journaling, and habit completion
- Designed modular logic for daily workflows, reminders, and time-based features such as breathing exercises
- Stored and retrieved user data using file-based persistence with clear separation of concerns

Travel Expense Tracker (Python)

- Developed a data analysis tool to process CSV-based expense records
- Used hash maps to aggregate spending by category and time period
- Generated summaries to identify spending patterns and trends

Hospital Record Management System (Python)

- Built a command-line record management system with structured storage of patient data
- Implemented efficient search and update operations on stored records
- Emphasized input validation and clean data organization

ADDITIONAL INFORMATION

- Actively strengthening foundations in data structures, algorithms, and software development
